...h and American Politics.

That the political course pursued by the Irish-Americans will have a strong influence in molding the sentiment of the next British Parliament, is thus forcibly set forth by the Sacramento *Union*:

Disraeli, like Seward, is a cunning politician. He knows the value of time when a decisive battle is to be fought and lays his plans so as to make every possible ally available. As the progress of liberal ideas in the United States, secured by the war, have reacted upon European, and especially upon English politics, he wisely reckons that any reactionary movement here will be felt there as well. We are to have our Presidential election in November. If the Republicans succeed in electing Grant it will be an affirmation that the country is well pleased with the progress it has made, and is marching forward on the river of the equal rights of man. It will be felt in England, and have a mighty influence in favor of reform in Ireland. On the other hand, if Johnson or Pendleton is elected, the English aristocracy will interpret the event as a sure sign that the Americans are distasteful of what they have begun and anxious to retreat toward the old conservative barricades erected by the Democratic party. In that institution has been managed by the slave lords. Such a result in America would pretty surely react against the Gladstone-Bright party in England and signalize the triumph of Disraeli and his Anti-Reform, High-Church, Tory possessors of Ireland. In any event, it will be of the highest importance to Disraeli. If our election, which falls on the 3d of November, is favorable to the party of progress, it will be the signal for England to the triumph of that party in the Ministry can take the field, change the ministerial policy accordingly, and so hold on to power. If we should choose to defy the will of the people, and thus imperil the safety of the Union, the effect upon the Irish populations, for both sides, will be disastrous to the Irish cause. A choice of Pendleton or Seymour would be a signal for the Fenian party to rise in arms. He knows the value of time, and will spend anything rather than lose it by postponing the elections till after [illegible] of next year. He shall have been known, he puts the public opinion of America auxiliary to his expedition. If the Irish-Americans help the Democratic party to defeat Grant, they may [illegible] at least they can with the [illegible] votes here will most powerfully [illegible] Parliament in the next Par[illegible]

Human Tortures.

MASTER CONTRIVANCES FOR PUNISHMENT IN THE DAYS OF OLD.

[From the Cornhill Magazine.]

The mildness of penal code eschewed monotony just as carefully as weakness. Its capital and other corporal punishments might be rather more frequent than modern prejudices approve of, but excellent care was taken to divest them of tedious uniformity. Mr. Justice Trosliyan, the very worthy predecessor of Jeffreys, was quite an artist in this species of deadly variety, as the followers of John Ball and Wat Tyler experienced, some of whom he hanged four times over before he allowed them to die. But elsewhere as our English adepts were, some of them were exceedingly so,—we must admit that they competed but poorly with their continental rivals, with whom, in the good old time, death was, beyond all question, the veritable "king of terrors."

Thanks to our novelists, the reading public is pretty well acquainted with the commoner appliances of torture; and we are therefore not under the necessity of enlarging on such fascinating items as the rack, the wheel, the thumbscrew and the boot. But these were only the every day forms of punishment. There were always individuals, princes and politicians, especially of the Byzantine empire, who rose superior to such vulgar usages, and with whom "killing by inches" was not a mere figure of speech, but a dread reality. Indeed some of their detestable inventions of cruelty have obtained as wide celebrity as the bull of Phalaris. There was the "*chambre a cercer*"—a heavy chest, short, shallow, and lined with sharp stones—in which the sufferer was packed, and the lid, heavily weighed, shut down on him. There were the "trenches," consisting of a mattress, on which the victim was fastened by the neck with bullock's sinews to keep him from moving, while his legs were passed through a stock and crushed between two great logs of wood, on the uppermost of which a man was seated; the process being repeated on the third day, which, as the old chronicler tells us, "was the cruelest thing that ever was heard of." There were the iron cages of Louis XI., in which some of his victims spent years, and which were so maliciously contrived that every position—standing, sitting or lying—was equally uncomfortable to the occupant. But, unquestionably, the master contrivance of all these delicate inventions for producing excruciating agony were the "baiser de la vierge" of Badon, and the "iron coffin" of Lima. In the former the prisoner, blindfold, and fastened in a chair, was lowed by a windlass through a well-like shaft, reaching from the top of the castle deep down into the heart of the rock on which it stands, so deep for the shaft still exists—that the visitor passing beneath can scarcely discern the glimmer of daylight at the top. Here he was immured in a dungeon hewn out of the living stone, and fitted with a door of the same material a foot thick, so artfully constructed that it was not to be distinguished from the adjoining wall. In this miserable cell, surrounded by darkness that might be felt—silent, helpless, hopeless, like a toad in the centre of its block—he remained until the hour of trial. He was then brought before his judges, who awaited him, masked and [illegible] in a large assortment, called the Hall of Judgment. From [illegible] he was extracted to the torture [illegible] den amply supplied with all the resources [illegible] and left to wait the [illegible] of the [illegible] days. The last [illegible] was spent through the last act of the tragedy. He was unbuckled from his iron bed and dragged [illegible] a bronze statue of the Virgin, that stood at the end of one of the large [illegible] the other end of which [illegible] was the pit [illegible] his agony. [illegible] with fattering [illegible] as he [illegible] his [illegible] of the Madonna, a trap door gave [illegible] and precipitated him, full [illegible] down [illegible] cadaverously pained while [illegible]

[illegible] which [illegible] aggravate [illegible] with [illegible] bottom [illegible] the prisoner and [illegible] dis[illegible] cadaverously pained while [illegible] day by day, and hour by hour, the side stealthily and [illegible] [illegible] said, and as [illegible] [illegible] [illegible]
